Full-Range Embedded SBC Offering

Advantech offers industrial-grade embedded single board computers (SBCs) in compact sizes with rugged design, high flexibility, and easy expansion capabilities. We offer a full range of products from Pico-ITX, 3.5", PC/104, to EBX.

Advantages of Embedded SBCs for E2I IoT Applications

Advantech Embedded Single Board Computers (SBC) series include: 2.5" Pico-ITX, 3.5" SBC, PC/104, 5.25" EBX, form factors. We offer a full-range of computing product from entry Atom series to Intel Core i7. They provide rich embedded features such as CANbus with isolation, high-speed multiple serial ports, 12-24 V power input, on-board storage and more. Moreover, Advantech's innovative MI/O (Multiple I/O) extension module delivers easy expansion capabilities to fulfill different market requirements.

Smallest Size

- 2.5" Pico-ITX
- 3.5" SBC
- PC/104

Rugged and Reliable Design

- -40~85° C wide temp support
- On-board storage for military critical
- High ESD protection

Domain Feature Focus

- 12/24V power input
- CANBus support
- MIOe Design in service

Software Integration

- Support iManager 3.0 & embedded API
- Supports embedded Yocto & Win10 IoT
- Advantech WISE-PaaS/EdgeSense IoT software

Full-Range Form Factor

2.5" Pico-ITX Single Board Computers

- Measures 100 x 72 mm
- Connector type: external (rear I/O)
- Single 12V DC power input
- 1 x Full-size Mini PCIe, 1 x Full-size mSATA*, 1 x MIOe
- Commercial & industrial temp support: 0 ~ 60° & 40° C ~ 85
- Performance range: Atom Quad core processor
- 6W power consumption

PC/104 CPU Boards

- Measures 96 x 90 mm to 96 x 115 mm
- Connector type: internal
- 5V ± 5% DC power input
- 1 x miniPCIe, 1 x SMBus, 1 x I2Cbus, 1 x PC/104, 1 x PCI-104, 1 x PC/104- Plus
- Commercial & industrial temp support: 0 ~ 60° & 40° C ~ 85
- Performance range: AMD LX80 to Intel Bay Trail
- 4-14W power consumption

3.5" Single Board Computers

- Measures 146 x 102 mm
- Connector type: external (rear I/O)
- 9-36V DC power input
- 1 x Full-size Mini PCIe, 1 x Full-size mSATA*, 1 x MIOe
- Commercial & industrial temp support: 0 ~ 60° & 40° C ~ 85
- Performance range: Atom Quad core processor to Core i
- 6-12W power consumption

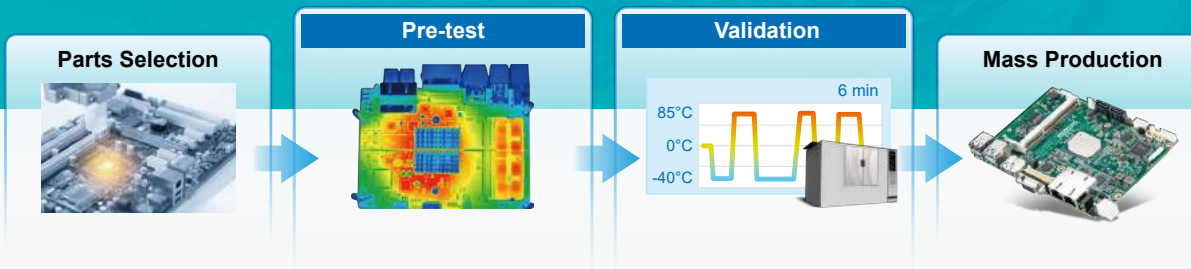

5.25" Single Board Computers

- Measures 203 x 146 mm
- Connector type: internal
- Single 12V DC power input
- 1 x Full-size Mini PCIe, 1 x Full-size mSATA*, 1 x MIOe,
- Commercial & industrial temp support: 0 ~ 60° & 40° C ~ 85
- Performance range: Intel Pentium, Celeron to Core i
- 6-45W power consumption

Rugged Solution

Industrial applications specifically designed for harsh environments or outdoor applications have unique requirements. Extreme environmental conditions, for example, high or low temperatures, thermal shock, high humidity, and electromagnetic disturbances, necessitate the most unique specifications. Because system failures are generally quite costly, all systems must have the highest level of failure tolerance to operate reliably under every possible condition. Wide temperature testing, innovative thermal solutions, and reliable component selections ensure the system's reliability in extreme operating environments.

Wide Temperature Testing Process

Highly Reliable Component Selections

ESBC (Embedded Single Board Computers) components are 100% compliant to -40~85°C temperature ranges for native extended temperature models. Advantech ESBC group believes that for high reliability and quality, component selection of extended temperature models should start from the beginning—at the EVT phase in the product's life cycle.

Design Stage Pre-Test

Ensuring each component selection can operate under -40 to 85°C, ESBCs with embedded peripherals and thermal solutions are validated two to three times. One of the most important tests is to confirm all components meet thermal profile testing.

Extended Temperature Testing (ETT) Solutions

During the design validation stage, embedded SBCs operate Phoenix testing to evaluate system and component performance under a range of environmental conditions, including various dynamic temperature burn-in cycles over extended periods of time. Depending on the system requirements, designs are required to pass -40 to 85°C testing without loss of function. This stringent testing process ensures the reliable performance of mission-critical applications under extreme and rapidly changing temperatures.

Testing for Mass Production

Advantech's Design Validation Phoenix testing process ensures embedded SBCs undergo dynamic a PassMark burn-in test at 100% loading and a power on-off test. This meets IEC60068-2-1; IEC60068-2-2; IEC60068-2-78; IEC60068-2-14 criteria. Before products are launched, embedded SBCs must receive complete certification of Phoenix operation. After launch, the embedded SBC factory operates -40 to 85°C testing again before shipping to qualify the quality, and Ongoing Reliability Tests (ORT) are performed regularly.

Innovative Thermal Solution

DHCS Technologies

The DHCS comprises a base and a heat conduction block. The base accommodates all of the parts and has a small bronze heat conduction block that mates with the CPU for efficient heat conduction, thus transferring heat from the CPU to the base.

Structure

Mates with CPU 100% for better heat transfer

Material

Copper deliver better thermal conductivity coefficient

Result

Achieves 20+ degree cooler than traditional Heatsink even in extremely environment

Fan Solution

In addition to a fanless design, Advantech also offers a fan-based 45W+ SBC solution with thin design. Advantech 3.5" MIO-5391 with 32mm cooler based on the Intel® Core™ i7 platform is ideal for compact and high performance applications.

Application Story

Rugged Solution for EV Charging System

Requirements

The EV charging system is expected to be an emerging market opportunity especially because the Korean government supports its introduction. It is estimated that more than 2,000 devices will be deployed over the next few years and revenues will reach USD 700K. A leading industrial company in Korea was looking for an integrated solution which is rugged, flexible, and durable for outdoor environment requirements.

Solutions

Advantech offers MIO-5350, 3.5" rugged single board computer with RAM/mSATA SQF supporting operating temperatures between -40°C ~ 85°C . It is equipped with rich I/O options on ports such as 2 x RS-232 and 2 x RS-232/422/485, and 2 x Giga Ethernet which can connect to several devices such as printers or POS.

Video-based Monitoring of Pantographs on High Speed Tracks

Requirements

Our customer is a first-tier manufacturer of railway cars and equipment in China, who now has gained nearly half of the high-speed locomotive assembly market. The installation of video-based monitoring systems on roofs of high-speed trains presented many challenges including the need for high-performance CPUs to support video monitoring operations, constant vibration, drastic temperature changes, as well as physical size and space restrictions on the trains. The system has to have excellent vibration-resistance, wide temperature support, and anti-jamming capabilities.

Solutions

Advantech provided MIO-5272 3.5" single board computers, which offer high performance with Intel Core i ULT i7 processor supports and 15W low power consumption, allow fanless operation, and provides $-40\sim 85^{\circ}\text{C}$ wide-range temperature support, delivering high reliability and ruggedness for long-term stable operation in harsh environments. Meanwhile, the provision of MIOe high-speed expansion interface will allow users to flexibly expand interfaces for PCIe, SMBus, USB 2.0/3.0, LPC line-out, power supplies, or DP.

The Smallest 2.5" SBC for AGV robot

Requirements

Automated Guided Vehicles (AGV) are widely used in factories and warehouses. A well-established AGV manufacturer customer in China was looking to design a new AGV vehicle incorporating the smallest form factor, low profile industrial grade computer with multiple I/O ports.

Solutions

MIO-3360 is equipped with Intel® Pentium N4200/Celeron N3350 support, and dual independent displays. It can expand its I/O quickly and flexibly via the innovative MI/O (Multiple I/O) unified connector. Using the customized MIOe board, MIO-3360 can expand I/O to a total of 1 x GbE, 2 x RS-232/422/485, and 4 x USB, etc. It also complies with the IEC standard for Electro Static Discharge (ESD) protection.

MIO-3360

Domain Focused Solution for Robotic Applications

Requirements

With a changing labor force and demographic dividend brought about by fertility rates and old age, accompanied by the rise of labor costs, many manufacturers in China are turning to robotic solutions and the Chinese government has been increasing its support for the robotics industry. One of our customers in China, the earliest pioneers in developing and implementing Industry 4.0 projects was looking for an industrial SBC for their solutions include robust designs, small form factors, expansion capability, and outstanding performance.

MIO-5850

Solutions

To meet the need for factory control and automation solutions, Advantech MIO-5850 incorporates a 4th Generation Intel Atom E3825/E3845 processor, WIN7/8/10 and Linux OS, and on-board eMMC memory in a robust fanless design. The CPU comes with a backplate to facilitate heat dissipation, and supports 3 Ethernet ports for robotic solutions and CAN bus functions as well as for standard communications. The on-board memory and storage is also part of the effort to meet the challenge of operating in harsh environments.

MIO Extension

Advantech's innovative MIO (Multiple I/O) Extension Single Board Computers all feature flexible and integrated multiple I/O to help aid efficient development, reduce resources, and assist integrators to provide optimized solutions in a more cost-effective way. By connecting with MIOe I/O extension modules which support additional extended unified interfaces including: DisplayPort, 4 PCIe x 1, LPC, SMBus, USB 2.0/USB 3.0, rugged solutions, audio line-out and power, customers receive the best I/O choices to fulfill vertical application development as well as helping them retain their specialist domain knowhow. These features are all part of Advantech's thoughtful effort to help integrators flexibly develop market-sensitive solutions and seize those promising business opportunities.

MIO Extension

Flexible Design Made Easy

MIO Design-in Process

Reference Design

- Off-the-shelf modules
- Available IP building blocks
- 2D/3D mechanical drawing

Design Checklist & Review

- Schematic design guide
- Layout checklist
- Local technical review service

Integration Services

- BIOS customization
- Thermal simulation & integration
- Enclosure & customization service

Why Advantech MIO Extension SBCs?

- Highly integrated design saves up to 20% of system space
- Design document and evaluation board support
- Flexibility for future I/O expansion and upgrades
- Time-saving and cost-effective solution for system integrators
- Advantech Embedded SBC industrial design with rugged solution

MIOe Design Features

MIO Extension has one unified MIOe connector which supports additional extended interfaces that give more flexible support to bundled I/O modules, either from Advantech or modules designed by the customer.

- DisplayPort: HDMI, LVDS, DVI, CRT or eDP display interface
- 4 PCIe x1: GbE, USB 3.0, SATA/RAID, FPGA or PCI expansion
- USB 2.0/ 3.0: Super speed storage, capture card, HD Webcam & display interface

Expansion Module Options

MIO Extension single board computers come with unified I/O connector coastlines, CompactFlash and PCIe Mini Card locations. An area under the board is also designated for a 2.5" hard disk. The structural uniformity helps eradicate possible problems with integration during future upgrades.

- Less cabling and lockable connectors on the bottom side
- Reduced assembly, complexity, and labor costs

MIOe Unified Connector

Advantech has developed a series of modules that are ready for future interface designs and made for flexible vertical application demands.

- Display module: 48-bit LVDS/ DisplayPort/ USB2.0
- Communication module: Triple GbE
- Multiple I/O module: Multiple COM Ports

Reduced Cabling

Embedded PC

Advantech also offers Embedded PCs (EPC) which are a full range enclosures and systems designed for 3.5" single board computers. EPC-S Series are slim and fanless system which target automation applications. EPC-C Series are compact and rugged embedded PCs for high-end and semi-outdoor applications such as outdoor kiosk.

EPC-S101

Embedded 3.5 SBC system for PCM-9310

- Intel® Braswell Celeron N3160/N3060, Atom E8000, DDR3L-1600MHz SODIMM up to 8GB
- Fanless slim system with wall-mount & desk mount removable flange, default support VESA mount & Din-rail mount at bottom side
- Supports 2 x Intel GbE, 8 x USB, HDMI, VGA, 4 x COM and 1 x Digital IO
- Built-in 1 x full size mSATA and 1 x full size MiniPCIe w/SIM
- Supports iManager, WISE-PaaS/RMM and Embedded Software APIs

EPC-S201

Fanless & Palm-sized DIN Rail System

- Intel® Braswell Celeron N3160/N3060, Atom E8000, DDR3L-1600MHz SODIMM up to 8GB
- Fanless slim system with wall-mount & desk mount removable flange, default support VESA mount & Din-rail mount at bottom side
- Supports 2 x Intel GbE, 8 x USB, HDMI, VGA, 4 x COM and 1 x Digital IO
- Built-in 1 x full size mSATA and 1 x full size MiniPCIe w/SIM
- Supports iManager, WISE-PaaS/RMM and Embedded Software APIs

EPC-C301

Compact & Rugged Solution

- Intel Skylake-U Core i5/Celeron DDR3L-1600MHz SODIMM up to 16GB
- 0-60°C compact system with wall mount or desk mount
- One side I/O: 8 xCOM ports, 4 xGbe LAN, 6 x USB, 1 xGPIO & Dual display: VGA & HDMI
- Expansion & storage: 1 x Full size MINI PCIe slot & 1 x Full size MINI PCIe slot for mSATA
- Win7, WES7, Linux, iManager, WISE-PaaS/RMM

Laser Labeling Machine

Requirements

One of our customers with extensive experience in the industry was looking for an embedded SBC with dual display interfaces for internal and external HMI, and also multiple USB and COM ports to support monitoring, control, and feedback for a laser labeling machine. Most important, the SBC needed top reliability, despite temperature and vibration challenges, as well as a compact design that could easily fit in a very limited space.

Solutions

Advantech provides EPC-S101, an Intel® N3000 series platform with only 6W power consumption. Such low heat dissipation and a fanless system design provide excellent reliability for critical field operations. EPC-S101 Two side-bracket I/O provide plenty of flexibility, including 6 x USB3.0/2.0 ports, VGA and HDMI, 4 x COM ports, DIO, audio, etc. EPC-S101 also support internal connector features including LVDS/ eDP, SMBus and add-on wireless modules with reserved antenna assemblies. Advantech also provides a built-in OS of the customer's choice—Windows or Linux—in addition to software APIs and utilities that help customers quickly implement their own applications.

Smart Factory

Requirements

Smart systems and automation equipment are essential aspects of industry4.0. The data collected from each factory forms the basis for smart factory applications. There are lots of small and mid-size factories all over the world, and many of them are built with limited space so it may be difficult for those small factories to expand and incorporate smart factory features. Small and fanless systems with sufficient I/O, together with multiple RS-232/422/485 provide an ideal choice.

Solutions

DIN rail EPC-S201 barebone systems designed with Celeron N3350, 2 x USB, 2 x RS-232/422/485 ports, 1 x GbE LAN and VGA are suitable for most existing factories. There is easy expansion for WiFi or storage and memory so there is no need for customers to worry about LAN connection. DIN rail mounting design provides suitable assembly methods for those space limited areas.

Smart Parking System

Requirements

Self-service equipment is becoming more mature and as the market keeps growing, problems caused by human error are decreasing. One such popular application is the smart parking system. Two or three cameras are required for capturing pictures of vehicles and parking space information, and these are connected to related gates for ingress and egress, printing tickets, or other features as necessary. A parking system with performance processors, multiple I/O and 6-8 COM ports are basic requirements.

Solutions

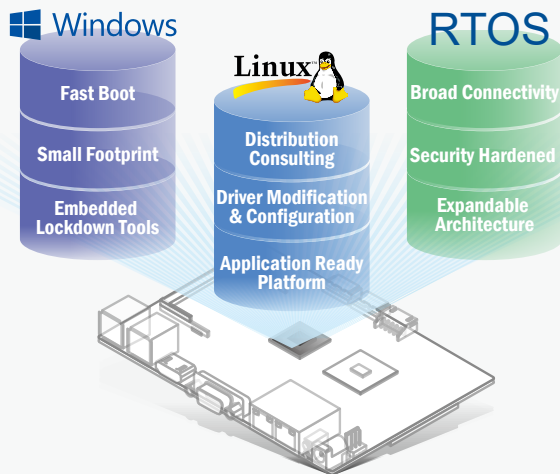

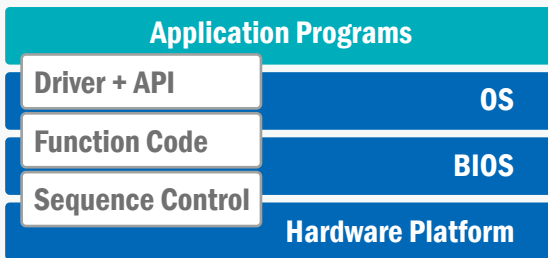

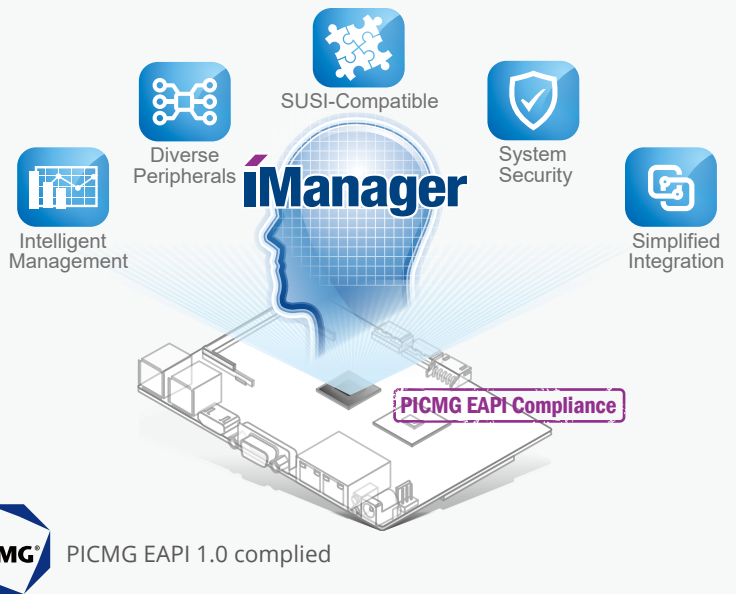

EPC-C301 is equipped with the Intel Skylake-U series CPU with 8 x COM ports (RS-232/422/485), 6 x USB ports, and at least 3 x Gbe LAN with HD audio, which are able to connect to different level devices for example, high speed cameras, Ethernet, COM ports, or GPIO. Inside the system there are two more expansion slots through miniPCIe connectors which provide variable choices for customers.

Software Integration

Advantech provides embedded software services including embedded OS, iManager 3.0, BIOS services, and IoT software WISE-PaaS/EdgeSense. Embedded software services help decrease design effort and project complexity, and accelerate product development.

iManager 3.0

To fulfill the ever-changing specialized demands of various industrial applications, Advantech designed an intelligent self-management firmware agent. iManager is a built-in solution chip with a standardized API that integrates several unique platform consolidating functions needed by embedded system integrators to help improve consistency, lighten development efforts, and speed up product time-to-market.

Embedded OS

Advantech provides full-featured Embedded BIOS solutions that deliver the superior performance compatibility and functionality that System Integrators need. A variety of options and extensions let customers tailor their products to a wide range of target markets, with the coreboot extended firmware feature delivering a lightning fast and secure boot experience. Furthermore, it includes a BIOS suite for building custom firmware tools for multiple OS, such as DMI, BIOS configurations, and modules.

WISE-PaaS/EdgeSense - Edge Intelligence & Sensor Integration

WISE-PaaS/EdgeSense is an edge intelligence and sensing integration software solution that incorporates sensor data aggregation, over-the-air software-in-time updates, edge analytics, cloud applications, and secure end-to-end data protection for fast and easy real-time device-to-cloud operational intelligence.

WISE-PaaS/RMM for Remote Monitoring and Management

WISE-PaaS/RMM is one of Advantech's IoT software platform services aimed at remote monitoring and management of IoT devices, bridging layers of IoT platform architecture, and anchoring predictive maintenance, big data analysis, and other domain-specific cloud applications.

Remote Device Management

- Remote monitoring and control (Power On/Off, KVM)
- Devices/groups/map view device management

Data Flow Logic Editor

- IBM Node-RED flow design tool
- Drag and drop plug-in nodes
- Integrated WISE-PaaS/RMM function nodes

Data Acquisition

- WISE-Agent dynamic data collection module
- Deployment plug-ins for various usage scenarios

Dashboard Builder

- Supports widgets for Google Maps, Gauge, Sparkline, Progress Bar, etc.
- Multiple data source formats supported

EPC-S Series

NEW

Preliminary

EPC-C Series

Model Name		EPC-S101	EPC-S201
Barebone system	Description	Fanless barebone w/ memory adoption	Fanless barebone system
Processor System	Compatible Motherboard	PCM-9310	MIO-2360
	Thermal Solution	Fanless	Fanless
	CPU	Intel Celeron N3160/N3060, Atom x5-E8000	Intel Celeron N3350 1.10GHz
	BIOS	AMI UEFI 64Mb SPI	AMI UEFI 64Mb SPI
Memory	Socket	1 x 204-pin SODIMM	1 x 204-pin SODIMM
	Technology	DDR3L-1600	DDR3L-1866
	Max. Capacity	Default 2GB adopted, up to 8GB	8GB
Graphics	Chipset Integrated	Intel Gen8LP	Intel Gen9LP
Storage	2.5" HDD Bay	Room for 1 x 2.5" SSD, max. 9.5mm height	-
	mSATA Slot	Full size SATAIII (opt. mPCIe)	Half size SATAIII
Ethernet	Interface	10/100/1000 Mbps	10/100/1000 Mbps
	Controller	LAN1: Realtek RTL8111E LAN2: Realtek RTL8111E	Intel i210
	Connector	RJ-45 x 2	RJ45
Audio	Codec	Realtek ALC892	Realtek ALC888
Internal expansion Slot	Mini-PCIe	Full size PCIe Gen2 (opt. 2 slots)	Full size PCIe Gen2
	M.2	1	-
	SIM slot	1	-
	SD slot	-	-
Front Panel	DP++	-	-
	DP/HDMI	HDMI 1.4b up to 2560 x 1600	Opt. HDMI 1.4b up to 3840 x 2160
	VGA	1	1
	DVI	-	-
	COM	-	1 (RS-232/422/485)
	LAN	2	1
	USB	4 (USB2.0 x 2, USB3.0 x 2)	2 x USB3.0
	Audio Jack	-	Line-in/Line-out
	Antenna (optional)	up to 1	up to 2
	Rear Panel/Side Panel	DP++	-
DP/HDMI		-	-
VGA		-	-
DVI		-	-
COM		4 (2 x RS-232, 2 x RS-232/422/485)	1 (RS-232/422/485)
LAN		-	-
USB		2 (USB2.0)	-
Audio Jack		Line-in, Line-out, Mic-in	-
GPIO		8-bit	8-bit
Antenna (optional)		up to 1	-
Miscellaneous	LED Indicators	2 (Power LED, HDD LED)	1 (Power LED)
	Switch	1 (Power Switch)	1 (Power Switch)
	Circular Cutouts	1	-
Mounting		Desk mount, VESA mount, DIN rail	Desk mount, Wall mount, DIN rail
Power Requirements	Power Voltage	12V DC-in	12V DC-in
	Power Input Type (Inlet)	Phoenix DC plug-in	Phoenix DC plug-in
	Consumption	4.5W (idle with Celeron N3060)	TBD
Environment	Operating Temperature	0 ~ 50 °C (32 ~ 122 °F)	0 ~ 50 °C (32 ~ 122 °F)
	Non-operating Temperature	-40 ~ 85 °C (-40 ~ 185 °F)	-40 ~ 85 °C (-40 ~ 185 °F)
	Humidity	Operating: 40 °C @ 95% RH, non-condensing Storage: 60 °C @ 95% RH, non-condensing	Operating: 40 °C @ 95% RH, non-condensing Storage: 60 °C @ 95% RH, non-condensing
	Vibration (5 ~ 500Hz)	IEC60068-2-64 random 3.0Grms IEC60068-2-6 sinusoidal 2.0G	IEC60068-2-64 random 3.0Grms IEC60068-2-6 sinusoidal 2.0G
	Shock	IEC60068-2-27 half-sine 30G/11ms	IEC60068-2-27 half-sine 30G/11ms
Certification		CE/FCC Class B CB/UL/CCC/BSMI	CE/FCC Class B CB/UL/CCC/BSMI/KCC
Physical Characteristics	Dimensions (W x H x D)	188 x 39 x 150 mm	134 x 100 x 44mm
	Weight	0.95kg	TBD

Model Name		EPC-C100	EPC-C300
Model Name		EPC-C100	EPC-C300
Supported Form Factor		3.5" SBC	3.5" MIO-Compact
Compatible Boards		PCM-9362/9363	MIO-5250/5251/5271
Thermal Solution		Fanless	Fanless, Fan-based for MIO-5271
Driver Bay	2.5" HDD and Slim ODD	1x2.5"HDD	1 x 2.5"HDD
Expansion	Slot		1 x SD card
	Socket	1 x miniPCIe	1 x mSATA, 1 x miniPCIe
Front Panel I/O		2 x USB, 2 x GbE, 1 x VGA, 1 x COM, 1 x PS/2	4 x USB, 3 x COM, LINE-IN, LINE-OUT, MIC-IN
Rear Panel I/O		4 x USB, 2 x GbE, 1 x VGA, 1 x HDMI	4 x COM ,GPIO, LINE-IN, LINE-OUT, MIC-IN
Miscellaneous	LED Indicators	2 x (Power LED, HDD LED)	2 x (Power LED, HDD LED)
	Switch	1 x (Power Switch)	1 x (Power Switch)
Power Requirements	Power Input Type (Inlet)	Single 12V DC, 2-Pole Phoenix DC plug in	Single 12V DC, 2-Pole Phoenix DC plug in
	Power supply	DC input with power adaptor	DC input with power adaptor
Environment	Operating Temperature	0 ~ 40 °C (32 ~ 104 °F)	0 ~ 40 °C (32 ~ 104 °F)
	Non-operating Temperature	-20 ~ 60 °C (-4 ~ 140 °F)	-20 ~ 60 °C (-4 ~ 140 °F)
	Humidity	10~85% @ 40 °C, non-condensing	10~85% @ 40 °C, non-condensing
	Vibration (5 ~ 500Hz)	SSD : 30G, IEC 60068-2-27, half sine, 11 ms duration	SSD : 30G, IEC 60068-2-27, half sine, 11 ms duration
Shock		SSD : 30G, IEC 60068-2-27, half sine, 11 ms duration	SSD : 30G, IEC 60068-2-27, half sine, 11 ms duration
Certification		CE,FCC Class A	CE,FCC Class A
Physical Characteristics	Dimensions (W x H x D)	200 x 60 x 145 mm	188 x 54 x 150 mm
