Special Product Features

3-way Isolation

- Isolation on 2 data ports and power circuit
- Optocouplers isolate input and output data signals
- Power line isolation adds a third degree of protection

Wide Isolation Zones

- Wider spacing between circuit board traces
- Greater distance that transients cannot breach
- No bypassing around isolation components

Port Powered

- RS-232 handshake lines supply enough power for most applications
- Eliminates external PSU cost, space and clutter
- Ideal for field service

Automatic Send Data Control (SDC)

- Hardware driver control
- SDC circuit monitors data to enable/disable driver
- No extra software or drivers to install

ULI-200 Series Features

ULI-210 Series

Serial to Fiber Converters

- Convert serial to SM or MM fiber optic
- Extend serial signals up to 15 km
- Data rate: up to 115.2 kbps

ULI-224 Series

RS-232 to 422/485 Converters

- Convert RS-232 to RS-422/485
- Data rate: up to 115.2 kbps
- Automatic Send Data Control

ULI-227 Series

RS-232 to TTL & Current Loop Converters

- RS-232 to 5V TTL or 3.3V TTL
- RS-232 to 20 mA current loop
- Data rate: up to 115.2 kbps

ULI-223 Series

RS-232 to 422 Converters

- Convert RS-232 signals to RS-422
- Extend signals up to 1.2 km
- Data rate: up to 115.2 kbps

ULI-226 Series

RS-232 to 485 Converter

- Convert RS-232 to RS-422
- Extend signals up to 1.2 km
- Data rate: up to 115.2 kbps

ULI-232 Series

RS-232 Isolated Repeaters & Isolators

- Isolation for data lines & devices
- Repeaters extend RS-232 15m
- Data rate: up to 230.4 kbps

ULI-238 Series

CAN Isolated Repeater

- Increase CAN network signals & nodes
- Various CAN protocols, frame lengths
- Data rate: up to 250 kbps (bit-wise)

ULI-250 Series

RS-232 Data Tap

- Monitor & record serial data
- In-line, transparent connection
- No external power required

ULI-234 Series

RS-422/485 Isolated Repeaters

- Extend RS-422/485 an extra 1.2km
- Add up to 32 nodes to RS-485 network
- 2 kV optical isolation protection

ULI-240 Series

Serial Surge Suppressors

- Protection stages on each line
- Rugged terminal block connections
- Dedicated chassis ground lugs

ULI-260 Series

RS-232 Data Splitter

- Connect two PCs to one peripheral without switching
- Use with serial devices

Special Product Features

HIGH RETENTION

High Retention USB Ports

- 50% stronger than standard USB ports
- Grip standard USB cables in high-vibration applications

LOCKED SERIAL NUMBER

Locked Serial Number

- Same models use same serial number, COM port
- Plug-and-play with multiple PCs and laptops
- One installation
- Ideal for field service

POWER

Powerful USB Port

- USB hub supplies adequate power for most applications
- Each port delivers 500mA (USB 2.0) / 900mA (USB 3.0) current

Port-to-Port Isolation

- Full isolation protection on multi-port devices
- Upstream isolated from downstream devices
- Downstream devices isolated from each other

ULI-300 & 400 Series Features

ULI-310/320 Series

USB to RS-232/422/485 Converters

- Converts USB to RS-232/422/485 (by model)
- RS-232/422/485 serial data rate: 921.6 kbps (by model)
- USB 2.0 Hi-Speed (480 Mbps) for ULI-310 Series
- USB 2.0 Full-Speed (12 Mbps) for ULI-320 Series
- In-line installation
- USB port-powered

ULI-340 Series

USB to RS-422/485 Converters

- Converts USB to RS-422/485
- Optical isolation protection
- USB 2.0 (backward compatible)
- 921.6 kbps serial data rate (by model)
- 480 Mbps USB data rate (by model)

ULI-350/360 Series

USB to 2/4-wire RS-485 Converters

- Connect RS-485 devices to USB port
- Up to 921.6 kbps serial data rate
- USB 2.0 (12 Mbps) data rate
- High retention USB port (by model#)
- Locked Serial Number (by model#)

ULI-410 Series

Industrial USB 2.0 Hubs

- Expand 1 USB port to 4 or 7 ports
- 1.5, 12 or 480 Mbps (by model)
- Wide temperature: -40 to +80 °C
- Isolation & ESD protections
- OEM open bare-board (# ULI-414LIB)

ULI-410H Series

Industrial USB 3.0 Hubs

- Expand 1 USB port to 4 or 7 ports
- ESD & surge protections
- SuperSpeed USB 3.0, up to 5 Gbps
- 900mA downstream peripheral power
- Heavy-duty industrial enclosure

ULI-420 Series

Industrial USB 2.0 Isolators

- Data & device isolation & ESD protections
- 1 or 2 port models
- 12 Mbps full speed
- High retention USB connector ports
- USB bus or external power (by model)

Application Scenarios

ULI-200 Serial to Fiber Optic Converters

The Challenge

A power plant in United States provides electrical power for the south-western area. Power is generated by a mix of nuclear, hydroelectric, oil, coal, and natural gas. Different substations on the grid use a variety of SCADA systems from multiple vendors, and each vendor implements its own serial communications circuits about how to wire, ground, bias and terminate their serial ports. The data communication between substations are long-distance and the operation environment of the transmission is prone to ground loops and noise. Communication glitches were a continual source of erroneous data errors and trouble.

The Solution

ULI series fiber to serial converters can extend and interconnect RS-232, RS-422, or RS-485 communications lines, creating a larger conglomerate serial network and at the same time provide isolation between substations. For example, ULI-211C serial to multimode fiber optic converter extends data communications up to 4 km (2.5 mi). It also provides the most versatile connection possible between any asynchronous full- or half-duplex serial equipment. In addition to direct point-to-point connectivity, it is capable operating in multi-drop mode. This allows one serial device to communicate with up to 31 other devices around a fiber optic ring. In addition, ULI-211C provides two-way optical isolation on the input and output lines.

ULI-200 Serial to Serial Converters with Port Powered

The Challenge

A factory manager is seeking a cost-effective serial communication solution to reduce the working time in hardware set-ups. The present serial communication system contains too many wiring processes and too many kinds of interface types.

The Solution

ULI serial converters are easy to communicate across interfaces, simple to deploy, and do not require an external PSU. ULI serial-to serial converters can convert between RS-232, RS-422, RS-485 (2-wire/4-wire), and TTL with different types of connectors. This reduces compatibility issues when various types of serial interfaces communicate with each other. Moreover, ULI series provides port powered converters such as ULI-226D that can receive power without using an external PSU, which simplifies the wiring process.

ULI-300 & 400 Series

Application Scenarios

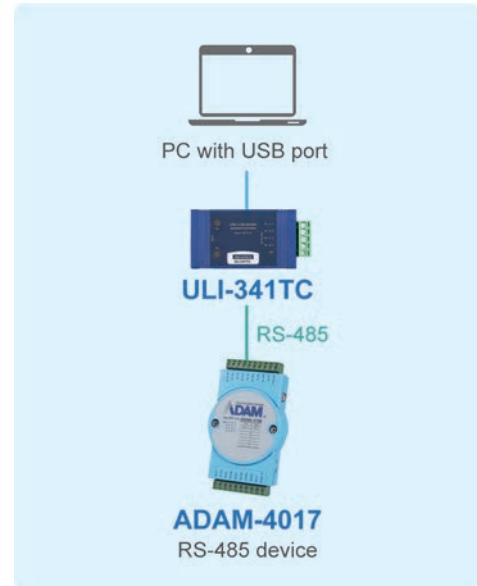

ULI-300 USB to Serial Converters

The Challenge

A system integrator was looking for a cost-effective solution for transmitting data from industrial legacy devices to IT systems. The equipment in the factory were usually designed to connect through a serial port, which is uncommon in modern PCs. However, the technicians were frequently asked to acquire data from equipment and run tests on different laptops in field service. When using a serial-to-USB converter, if the converter was shared among several laptops, drivers needed to be re-installed and run set ups , which was time consuming.

The Solution

The Advantech ULI Serial-to-USB converter solutions allows serial equipped legacy devices such as PLCs, to communicate with a PC via a USB port for data visualization and management. Moreover, with the “locked serial number” function such as ULI-341TCK, when the converter is shared among several field service laptops, the driver will only need to be installed once on each PC, the locked serial number function will let you plug and play many times without having to worry about re-installing drivers when matching the two. This saves immense work time for technicians in field service and at the same time increases productivity.

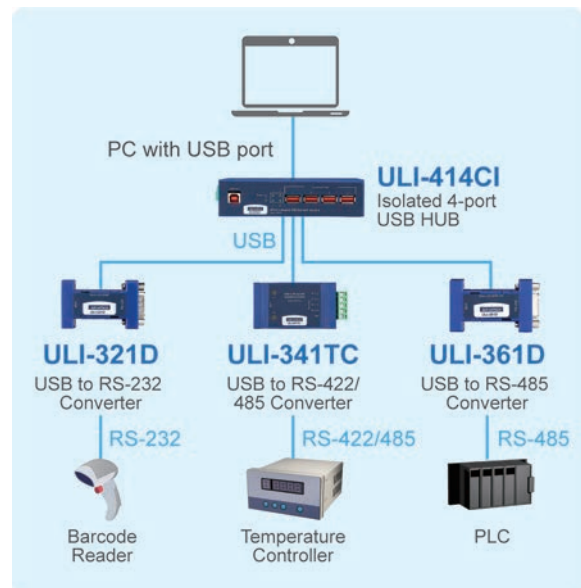

ULI-400 USB Hubs and Isolators

The Challenge

Most laptops are equipped with only two USB ports, when in practice, multiple USB ports are needed to connect various applications such as barcode scanner, printer, keypad or card reader. Some laptops for use in industrial applications operate in harsh environments that can easily be damaged, which increases costs on maintenance and management. Additionally, most standard USB port connectors used in hazardous environment come loose too easily, which affects data integrity and factory operations.

The Solution

The Advantech ULI-400 USB 2.0 and 3.0 hubs are more robust than commercial-grade hubs and can be easily expanded 4 or 7 extra USB ports. Moreover, ULI-400 series features isolation and ESD protection that is ideal for electrically harsh environments and wide operating temperature environments while its rugged design ensures reliability and reduced cost from equipment damage. Additionally, high retention USB connectors from ULI-400 series are used to prevent the cables from falling out. This is accomplished through a tight friction fit allowing a standard USB cable to be used to reduce overall installation cost.
