Sustainable Intelligent Facility Solutions

Accelerating Energy Efficiency Through Enhanced Operational Insights

Solution

FactoryEHS

Introduction

The right EHS management system can strengthen organizations behind the scenes and enable them to continuously put their best foot forward. FactoryEHS solution is designed to help manufacturers manage employee health, improve safety, and analyze environmental footprints while ensuring operational continuity.

Reduce Carbon Footprint

Optimize high carbon emission processes while reducing carbon footprint

Keep Workers Safe

Improve workplace safety and manage incidents as they happen to improve ESG & sustainable management.

Streamline Workflows

Reduce equipment data integration and rework time/costs by consolidating and centralizing tasks and information in the command center.

Mobile Management

Improve problem solving flexibility and convenience while accelerating problem elimination and reducing downtime costs

Problems

Compliance with new regulations — especially carbon-emission regulations.

ISO 14064/14067/50001 CBAM

Follow ISO 14064/14067/50001 standards to comply with CBAM.

Difficulties tracking, analyzing, and monitoring indicators can cause injuries and incidents.

Use AI to monitor events and send alarms immediately using iMobile services.

Factory management is complex, making cost origin identification difficult.

Monitor devices via the Command Center and leverage BI tools to analyze complex problems.

Innovative Advantech Solutions

Carbon Footprint Calculation

Based on ISO 14064/14067, this solution can calculate carbon footprints automatically using input data sources.

Factory Energy Management

Collect data from power meters. Display results on the dashboard for easy monitoring. Set targets based on ISO 50001 to continually track the savings plan.

Safety & Incident Monitoring

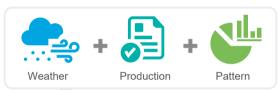

Monitor worker safety and PPE in real time. Set automatic incident alarms before injuries occur.

Artificial Intelligence Technology

From aimless "Cost Reduction" to smart "Cost Optimization"

Costs can be divided into accident costs and prevention costs. Al can more accurately predict failure dates and reduce accident rates. Likewise, Al can further provide error classification that reduces maintenance times and improves overall factory profits.

Success Story

Centralized Monitoring and Data Management Optimizes Energy Efficiency

A well-known Taiwanese EMS foundry adopted Advantech iFactory's energy sustainability management solution in a Mexican factory in order to accelerate regulation compliance.

Key Benefits

- Enables the factory energy management without large capital investment, and reduces energy waste costs between 8 \sim 13%.
- 24/7 monitoring of factory energy usage enables operators to respond to abnormalities quickly.
- 7 day energy consumption forecasting avoids exceeding contract capacity.

Energy Mamagement/ Carbon Footprint

Data Center Package

Energy Management Settings

Energy Overview

Displays energy consumption and cumulative usage value for managers enabling monthly consumption monitoring.

Environmental Monitoring

Displays the temperature, humidity, and CO2 emissions from individual regions via Grafana Flow Charting.

KPI Management

Energy Consumption Monitoring

Establishes a baseline for energy to determine energy-saving goals. Track actual savings rate to measure saving plan effectiveness.

Prediction

Demand ForecastingPredict peak demand in the

Predict peak demand in the next short period of time to ensure that the contracted capacity is not exceeded.

Ordering Information

2024 Special Package

EHS Monitoring Software

9803ITEHS00

- 5 licenses with one-year subscription
- Functions include Utility Manager, FMS, and Environment-Monitor

Edge Solution		
Intelligent Facility & Sustainability	IFS-RTM-HP73WX HPC-7320 / EPYC™ Zen2 8 C / 4 x 32G / 2 x 480G (RAID 1) / 2 x 1920G (RAID 1)	Factory AMDA EPYC
Solution Ready Packages		
Facility Management and Sustainability (FMS)	IFS-RTM-M7703W7B MIC-770 V3 / i7 / 32G / 128G + 1T SSD / Win10 Optional 50 EHS licenses available for RTM	Factory Marie Control
	IFS-RTM-M7703W5B MIC-770 V3 / i5 / 16G / 128G + 500G SSD / Win10 Optional 20 EHS licenses available for RTM	Factory Williams Inc.
Additional Offerings		
Gateway	SRP-IFS420-E12TAE Protocol gateway with EdgeLink, 2 x LAN, 2 x COM, 1 GB storage 96PD-01075 Remote maintenance protocol gateway, 1 x LAN, 2 x COM, 1 x USB	The state of the s
Remote Terminal Unit (RTU)	SRP-IFS210-D36TAE Modular edge intelligent data acquisition with EdgeLink, 2 x LAN, 3 x COM, 8 x AI, 16 x DI, 4 x DO, 1 GB storage	
Smart Power Meter	96PD-01283 Multi-function panel mount smart power meter 96PD-01285 Multi-loop din-rail smart power meter	
Sensor	96PD-THS16B IP65 high accuracy temperature & humidity sensor	
Remote Ethernet I/O	ADAM-6015-DE 7-CH isolated RTD input Modbus TCP module
