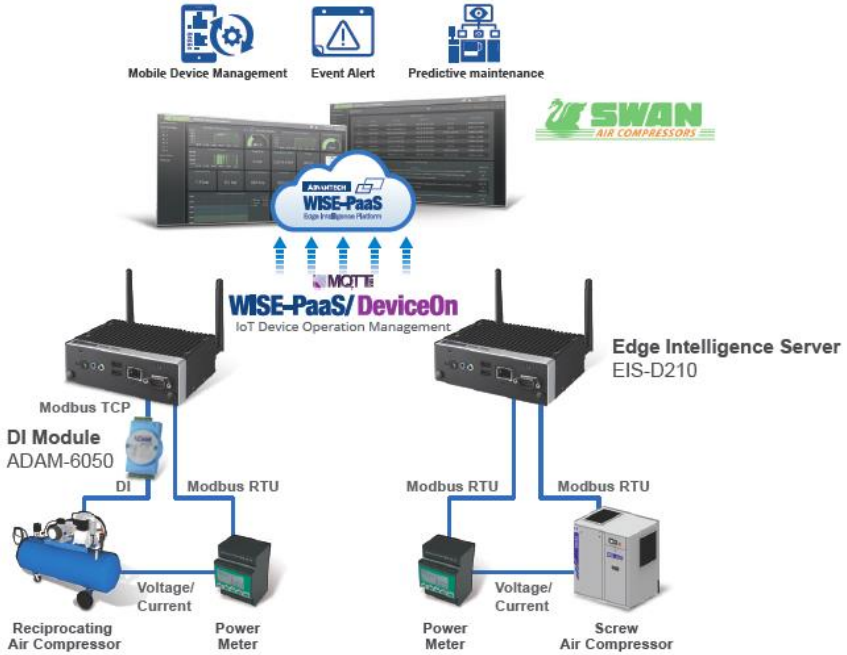
Air Compressor Manufacturer Creates New Service Model with IoT Edge Technology



- **Powerful connectivity and data acquisition capabilities** help the customer quickly deploy IoT and integrate field data with backend management.
- Provides a multitude of APIs to develop **customizable dashboards** and messages and **integrate cross-platform data** and applications.
- Allows customers to inaugurate **preventive maintenance**, which adds value to their compressor products, minimizes unexpected equipment breakdowns.

Semiconductor Manufacturer Uses DeviceOn to Increase Production Utilization

Challenge

Require the most controls of data security and operation monitoring

Key

- Device Management
- Predictive maintenance

Solution

- Built-in Algorithm in DeviceOn
- To maintain beforehand
- ERP/MES integration

WISE-PaaS is designed for…

Machine Builder

- Embed WISE-PaaS software in their products
- Make services value-added leveraging PaaS solutions

Channel Partner

- Resell software and SRP on the WISE-PaaS Marketplace to end customers
- Share Advantech's marketing resources

System Integrator

- Focus on application integration and deployment in specific domains using Advantech hardware and WISE-PaaS
- Complete certified training and receive architecture consultation
- Leverage Advantech's marketing resources

Software Developer

- Develop ready to use solutions for IoT scenarios based on Advantech hardware and WISE-PaaS
- Publish solutions on the Marketplace
- Leverage Advantech's biz networking
