**Consolidated Financial Statements for the
Nine Months Ended September 30, 2015 and 2014 and
Independent Auditors' Review Report**

INDEPENDENT AUDITORS' REVIEW REPORT

The Board of Directors and Shareholders
Advantech Co., Ltd.

We have reviewed the accompanying consolidated balance sheets of Advantech Co., Ltd. (the "Company") and its subsidiaries (collectively referred to as the "Group") as of September 30, 2015, December 31, 2014 and September 30, 2014 and the related consolidated statements of comprehensive income for the three months and nine months ended September 30, 2015 and 2014, and changes in equity and cash flows for the nine months ended September 30, 2015 and 2014. These consolidated financial statements are the responsibility of the Company's management. Our responsibility is to issue a report on these consolidated financial statements based on our reviews. However, the financial statements of an associate, Axiomtek Co., Ltd., as of and for the nine months ended September 30, 2015 and 2014 were reviewed by other independent CPAs. This investee's shares of the investments accounted for using the equity method were 1.33% (NT\$423,688 thousand) and 1.35% (NT\$396,950 thousand) of the Company's total consolidated assets as of September 30, 2015 and 2014, respectively. The Company's shares of its profits were 2.60% (NT\$39,503 thousand), 1.64% (NT\$26,149 thousand), 1.78% (NT\$82,178 thousand) and 1.74% (NT\$78,760 thousand) of the Company's consolidated pretax profits for the three months and nine months ended September 30, 2015 and 2014, respectively.

Except as stated in the following paragraph, we conducted our reviews in accordance with Statement of Auditing Standards No. 36 "Engagements to Review Financial Statements" issued by the Auditing Standards Committee of the Accounting Research and Development Foundation of the Republic of China. A review consists principally of applying analytical procedures to financial data and of making inquiries of persons responsible for financial and accounting matters. It is substantially less in scope than an audit conducted in accordance with auditing standards generally accepted in the Republic of China, the objective of which is the expression of an opinion regarding the consolidated financial statements taken as a whole. Accordingly, we do not express such an opinion.

As disclosed in Note 12, the financial statements of the Company's subsidiaries included in the consolidation for the nine months ended September 30, 2015 and 2014 had not been reviewed, except those of significant subsidiaries. The total assets of the unreviewed subsidiaries were 15.55% (NT\$4,956,378 thousand) and 14.71% (NT\$4,312,954 thousand) of the Company's consolidated total assets as of September 30, 2015 and 2014, respectively. The total liabilities of the unreviewed subsidiaries were 20.61% (NT\$1,971,145 thousand) and 21.78% (NT\$1,897,774 thousand) of the Company's consolidated total liabilities as of September 30, 2015 and 2014, respectively. The comprehensive incomes of these subsidiaries were 3.69% (NT\$49,470 thousand), 16.51% (NT\$189,500 thousand), 12.30% (NT\$423,562 thousand) and 15.47% (NT\$608,063 thousand) of the Company's consolidated comprehensive incomes in the three months and nine months ended September 30, 2015 and 2014, respectively. Also, as stated in Note 13 to the consolidated financial statements, the investments accounted for using the equity method were NT\$27,683 thousand and NT\$28,502 thousand as of September 30, 2015 and 2014, respectively. The equities in earnings of the associates were a loss of NT\$11 thousand, a profit of NT\$1,786 thousand, a loss of NT\$304 thousand and a profit of NT\$2,994 thousand of the Company's consolidated net income in the three months and nine months ended September 30,

2015 and 2014, respectively, and these investment amounts as well as additional disclosures in Note 31 “Information on Investees” were based on the investees’ unreviewed financial statements for the same reporting periods as those of the Company.

Based on our reviews and the review reports of the other auditors, except for the effects of any adjustments as might have been determined to be necessary had the financial statements of the Company’s subsidiaries described in the preceding paragraph been reviewed, we are not aware of any material modifications that should be made to the consolidated financial statements of Advantech Co., Ltd. and subsidiaries referred to above for them to be in conformity with the Regulations Governing the Preparation of Financial Reports by Securities Issuers and International Accounting Standard 34 “Interim Financial Reporting” endorsed by the Financial Supervisory Commission (FSC) of the Republic of China.

As disclosed in Note 3 to the financial statements, the Group has applied the 2013 version of the IFRS, IAS, IFRIC and SIC (collectively, the “IFRSs”) endorsed by the FSC and the related amendments made on January 1, 2015 on the Regulations Governing the Preparation of Financial Reports by Securities Issuers and has disclosed the effects of the retrospective application of the IFRSs and the financial statement restatement resulting from the retrospective IFRS application.

Notice to Readers

The accompanying consolidated financial statements are intended only to present the consolidated financial position, financial performance and cash flows in accordance with accounting principles and practices generally accepted in the Republic of China and not those of any other jurisdictions. The standards, procedures and practices to review such consolidated financial statements are those generally applied in the Republic of China.

For the convenience of readers, the independent auditors’ review report and the accompanying consolidated financial statements have been translated into English from the original Chinese version prepared and used in the Republic of China. If there is any conflict between the English version and the original Chinese version or any difference in the interpretation of the two versions, the Chinese-language independent auditors’ review report and consolidated financial statements shall prevail.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS FOR THE NINE MONTHS ENDED SEPTEMBER 30, 2015 AND 2014 (In Thousands of New Taiwan Dollars, Unless Stated Otherwise) (Reviewed, Not Audited)

1. GENERAL INFORMATION

Advantech Co., Ltd. (the “Company”) is a listed company established in September 1981. It manufactures and sells embedded computing boards, industrial automation products, applied computers and industrial computers.

The Company’s shares have been listed on the Taiwan Stock Exchange since December 1999.

To improve the entire operating efficiency of Advantech Co., Ltd. (the “Company”) and its subsidiaries (collectively referred to as the “Group”), the Company’s board of directors resolved on June 30, 2009 to have a short-form merger with Advantech Investment and Management Service (AIMS). The effective merger date was July 30, 2009. As the survivor entity, the Company assumed all assets and liabilities of AIMS.

On June 26, 2014, the Company’s board of directors resolved to have a whale-minnow merger with Netstar Technology Co., Ltd. (Netstar), an indirect 95.51% -owned subsidiary through a wholly-owned subsidiary, Advantech Corporate Investment. The effective merger date was July 27, 2014. As the survivor entity, the Company assumed all assets and liabilities of Netstar.

The functional currency of the Company is the New Taiwan dollar.

2. APPROVAL OF FINANCIAL STATEMENTS

The consolidated financial statements were approved by the board of directors and authorized for issue on October 30, 2015.

3. APPLICATION OF NEW, AMENDED AND REVISED STANDARDS AND INTERPRETATIONS

- a. Initial application of the amendments to the Regulations Governing the Preparation of Financial Reports by Securities Issuers and the 2013 version of the International Financial Reporting Standards (IFRS), International Accounting Standards (IAS), Interpretations of IFRS (IFRIC), and Interpretations of IAS (SIC) endorsed by the FSC.

Rule No. 1030029342 and Rule No. 1030010325 issued by the FSC on April 3, 2014, stipulated that the Group should apply the 2013 version of IFRS, IAS, IFRIC and SIC (collectively, the “IFRSs”) endorsed by the FSC and the related amendments to the Regulations Governing the Preparation of Financial Reports by Securities Issuers starting January 1, 2015.

Except for the following, whenever applied, the initial application of the above 2013 IFRSs version and the related amendments to the Regulations Governing the Preparation of Financial Reports by Securities Issuers would not have any material impact on the Group's accounting policies:

1) IFRS 12 "Disclosure of Interests in Other Entities"

IFRS 12 is a new disclosure standard and is applicable to entities that have interests in subsidiaries, associates and/or unconsolidated structured entities. In general, the disclosure requirements in IFRS 12 are more extensive than in the current standards.

2) Revision to IAS 28 "Investments in Associates and Joint Ventures"

Revised IAS 28 requires when a portion of an investment in an associate meets the criteria to be classified as held for sale, that portion is classified as held for sale. Any retained portion that has not been classified as held for sale is accounted for using the equity method. Under current IAS 28, when a portion of an investment in associates meets the criteria to be classified as held for sale, the entire investment is classified as held for sale and ceases to apply the equity method.

3) IFRS 13 "Fair Value Measurement"

IFRS 13 establishes a single source of guidance for fair value measurements. It defines fair value, establishes a framework for measuring fair value, and requires disclosures about fair value measurements. The disclosure requirements in IFRS 13 are more extensive than those required in the current standards. For example, quantitative and qualitative disclosures based on the three-level fair value hierarchy currently required for financial instruments only will be extended by IFRS 13 to cover all assets and liabilities within its scope.

The fair value measurements under IFRS 13 will be applied prospectively from January 1, 2015. Refer to Note 26 for the related disclosures.

4) Amendment to IAS 1 "Presentation of Items of Other Comprehensive Income"

The amendment to IAS 1 requires items of other comprehensive income to be grouped into those items that (1) will not be reclassified subsequently to profit or loss; and (2) may be reclassified subsequently to profit or loss. Income taxes on related items of other comprehensive income are grouped on the same basis. Under current IAS 1, there were no such requirements.

The Group will retrospectively apply the above amendments, starting from the year 2015. Items not expected to be reclassified to profit or loss are remeasurements of the defined benefit plans. Items expected to be reclassified to profit or loss are the exchange differences on translating foreign operations, unrealized gain (loss) on available-for-sale financial assets, and share of the other comprehensive income (except the share of the remeasurements of the defined benefit plans) of associates accounted for using the equity method.

However, the application of the above amendments will not result in any impact on the net profit for the period, other comprehensive income for the period (net of income tax), and total comprehensive income for the period.

5) Revision to IAS 19 "Employee Benefits"

Revised IAS 19 requires the recognition of changes in defined benefit obligations and in the fair value of plan assets when they occur, and hence eliminates the "corridor approach" permitted under current IAS 19 and accelerate the recognition of past service costs. The revision requires all remeasurements of the defined benefit plans to be recognized immediately through other comprehensive income in order for the net pension asset or liability to reflect the full value of the plan deficit or surplus.

Furthermore, the interest cost and expected return on plan assets used in current IAS 19 are replaced with a “net interest” amount, which is calculated by applying the discount rate to the net defined benefit liability or asset. In addition, the revised IAS 19 introduces certain changes in the presentation of the defined benefit cost, and also includes more extensive disclosures.

On initial application of the revised IAS 19 in 2015, the changes in cumulative employee benefit costs as of December 31, 2013 resulting from the retrospective application are adjusted to net defined benefit liabilities and retained earnings. The carrying amounts of inventories are not adjusted. In addition, in preparing the consolidated financial statements for the year ended December 31, 2015, the Group would elect not to present 2014 comparative information about the sensitivity of the defined benefit obligation.

Annual Improvements to IFRSs: 2009-2011 Cycle

The amendments to IAS 1 clarify that an entity is required to present a balance sheet as at the beginning of the preceding period when a) it applies an accounting policy retrospectively, or makes a retrospective restatement or reclassifies items in its financial statements, and b) the retrospective application, restatement or reclassification has a material effect on the information in the balance sheet at the beginning of the preceding period. The amendments also clarify that related notes are not required to accompany the balance sheet at the beginning of the preceding period.

b. New IFRSs in issue by IASB but not yet endorsed by FSC

The Group has not applied the following New IFRSs issued by the IASB but not yet endorsed by the FSC. As of the date the consolidated financial statements were authorized for issue, the FSC has not announced their effective dates.

IFRIC 21 “Levies”	January 1, 2014

Note 1: Unless stated otherwise, the above New IFRSs are effective for annual periods beginning on or after their respective effective dates.

Note 2: The amendment to IFRS 2 applies to share-based payment transactions with grant date on or after July 1, 2014; the amendment to IFRS 3 applies to business combinations with acquisition date on or after July 1, 2014; the amendment to IFRS 13 is effective immediately; the remaining amendments are effective for annual periods beginning on or after July 1, 2014.

Note 3: Prospectively applicable to transactions occurring in annual periods beginning on or after January 1, 2016.

Note 4: The amendment to IFRS 5 is applied prospectively to changes in a method of disposal that occur in annual periods beginning on or after January 1, 2016; the remaining amendments are effective for annual periods beginning on or after January 1, 2016.

The initial application of the above New IFRSs, whenever applied, would not have any material impact on the Group's accounting policies, except for the following:

1) IFRS 9 "Financial Instruments"

Recognition and measurement of financial assets

With regards to financial assets, all recognized financial assets that are within the scope of IAS 39 "Financial Instruments: Recognition and Measurement" are subsequently measured at amortized cost or fair value. Under IFRS 9, the requirement for the classification of financial assets is stated below.

For the Group's debt instruments that have contractual cash flows that are solely payments of principal and interest on the principal amount outstanding, their classification and measurement are as follows:

- a) For debt instruments, if they are held within a business model whose objective is to collect the contractual cash flows, the financial assets are measured at amortized cost and are assessed for impairment continuously with impairment loss recognized in profit or loss, if any. Interest revenue is recognized in profit or loss by using the effective interest method;
- b) For debt instruments, if they are held within a business model whose objective is achieved by both collecting contractual cash flows and selling financial assets, the financial assets are measured at fair value through other comprehensive income (FVTOCI) and are assessed for impairment. Interest revenue is recognized in profit or loss by using the effective interest method, and other gain or loss shall be recognized in other comprehensive income, except for impairment gains or losses and foreign exchange gains and losses. When the debt instruments are derecognized or reclassified the cumulative gain or loss previously recognized in other comprehensive income is reclassified from equity to profit or loss.

The Company held financial assets measured at fair value, with changes in fair value recognized in profit or loss. However, the Group may make an irrevocable election to present subsequent changes in the fair value of an equity investment (that is not held for trading) in other comprehensive income, with only dividend income generally recognized in profit or loss. No subsequent impairment assessment is required, and the cumulative gain or loss previously recognized in other comprehensive income cannot be reclassified from equity to profit or loss.

The impairment of financial assets

IFRS 9 requires that impairment loss on financial assets is recognized by using the "Expected Credit Losses Model". The credit loss allowance is required for financial assets measured at amortized cost, financial assets mandatorily measured at FVTOCI, lease receivables, contract assets arising from IFRS 15 "Revenue from Contracts with Customers", certain written loan commitments and financial guarantee contracts. A loss allowance for the 12-month expected credit losses is required for a financial asset if its credit risk has not increased significantly since initial recognition. A loss allowance for full lifetime expected credit losses is required for a financial asset if its credit risk has increased significantly since initial recognition and is not low. However, a loss allowance for full lifetime expected credit losses is required for trade receivables that do not constitute a financing transaction.

For purchased or originated credit-impaired financial assets, the Group takes into account the expected credit losses on initial recognition in calculating the credit-adjusted effective interest rate. Subsequently, any changes in expected losses are recognized as a loss allowance with a corresponding gain or loss recognized in profit or loss.

2) Amendment to IAS 36 “Recoverable Amount Disclosures for Non-financial Assets”

In issuing IFRS 13 “Fair Value Measurement”, the IASB made consequential amendment to the disclosure requirements in IAS 36 “Impairment of Assets”, introducing a requirement to disclose in every reporting period the recoverable amount of an asset or each cash-generating unit. The amendment clarifies that such disclosure of recoverable amounts is required only when an impairment loss has been recognized or reversed during the period. Furthermore, the Group is required to disclose the discount rate used in measurements of the recoverable amount based on fair value less costs of disposal measured using a present value technique.

3) IFRIC 21 “Levies”

IFRIC 21 provides guidance on when to recognize a liability for a levy imposed by a government. It addresses the accounting for a liability whose timing and amount is certain and the accounting for a provision whose timing or amount is not certain. The Group accrues related liability when the transaction or activity that triggers the payment of the levy occurs. Therefore, if the obligating event occurs over a period of time (such as generation of revenue over a period of time), the liability is recognized progressively. If an obligation to pay a levy is triggered upon reaching a minimum threshold (such as a minimum amount of revenue or sales generated), the liability is recognized when that minimum threshold is reached.

4) Annual Improvements to IFRSs: 2010-2012 Cycle

Several standards including IFRS 2 “Share-based Payment”, IFRS 3 “Business Combinations” and IFRS 8 “Operating Segments” were amended in this annual improvement.

The amended IFRS 2 changes the definitions of “vesting condition” and “market condition” and adds definitions for “performance condition” and “service condition”. The amendment clarifies that a performance target can be based on the operations (i.e. a non-market condition) of the Group or another entity in the same group or the market price of the equity instruments of the Group or another entity in the same group (i.e. a market condition); that a performance target can relate either to the performance of the Group as a whole or to some part of it (e.g. a division); and that the period for achieving a performance condition must not extend beyond the end of the related service period. In addition, a share market index target is not a performance condition because it not only reflects the performance of the Group, but also of other entities outside the Group.

IFRS 3 was amended to clarify that contingent consideration should be measured at fair value, irrespective of whether the contingent consideration is a financial instrument within the scope of IFRS 9 or IAS 39. Changes in fair value should be recognized in profit or loss.

The amended IFRS 8 requires an entity to disclose the judgments made by management in applying the aggregation criteria to operating segments, including a description of the operating segments aggregated and the economic indicators assessed in determining whether the operating segments have “similar economic characteristics”. The amendment also clarifies that a reconciliation of the total of the reportable segments’ assets to the entity’s assets should only be provided if the segments’ assets are regularly provided to the chief operating decision-maker.

IFRS 13 was amended to clarify that the issuance of IFRS 13 did not remove the ability to measure short-term receivables and payables with no stated interest rate at their invoice amounts without discounting, if the effect of not discounting is immaterial.

IAS 24 was amended to clarify that a management entity providing key management personnel services to the Group is a related party of the Group. Consequently, the Group is required to disclose as related party transactions the amounts incurred for the service paid or payable to the management entity for the provision of key management personnel services. However, disclosure of the components of such compensation is not required.

5) Annual Improvements to IFRSs: 2011-2013 Cycle

Several standards including IFRS 3 and IFRS 13 were amended in this annual improvement.

IFRS 3 was amended to clarify that IFRS 3 does not apply to the accounting for the formation of all types of joint arrangements in the financial statements of the joint arrangement itself.

The scope in IFRS 13 of the portfolio exception for measuring the fair value of a group of financial assets and financial liabilities on a net basis was amended to clarify that it includes all contracts that are within the scope of, and accounted for in accordance with, IAS 39 or IFRS 9, even if those contracts do not meet the definitions of financial assets or financial liabilities within IAS 32.

6) Amendments to IAS 16 and IAS 38 “Clarification of Acceptable Methods of Depreciation and Amortization”

The entity should use appropriate depreciation and amortization method to reflect the pattern in which the future economic benefits of the property, plant and equipment and intangible asset are expected to be consumed by the entity.

The amended IAS 16 “Property, Plant and Equipment” requires that a depreciation method that is based on revenue that is generated by an activity that includes the use of an asset is not appropriate. The amended standard does not provide any exception from this requirement.

The amended IAS 38 “Intangible Assets” requires that there is a rebuttable presumption that an amortization method that is based on revenue that is generated by an activity that includes the use of an intangible asset is not appropriate. This presumption can be overcome only in the following limited circumstances:

- a) In which the intangible asset is expressed as a measure of revenue (for example, the contract that specifies the entity’s use of the intangible asset will expire upon achievement of a revenue threshold); or
- b) When it can be demonstrated that revenue and the consumption of the economic benefits of the intangible asset are highly correlated.

An entity should apply the aforementioned amendments prospectively for annual periods beginning on or after the effective date.

7) IFRS 15 “Revenue from Contracts with Customers”

IFRS 15 establishes principles for recognizing revenue that apply to all contracts with customers, and will supersede IAS 18 “Revenue”, IAS 11 “Construction Contracts” and a number of revenue-related interpretations from January 1, 2017.

When applying IFRS 15, an entity shall recognize revenue by applying the following steps:

- Identify the contract with the customer;
- Identify the performance obligations in the contract;
- Determine the transaction price;
- Allocate the transaction price to the performance obligations in the contracts; and
- Recognize revenue when the entity satisfies a performance obligation.

When IFRS 15 is effective, an entity may elect to apply this Standard either retrospectively to each prior reporting period presented or retrospectively with the cumulative effect of initially applying this Standard recognized at the date of initial application.

8) Amendments to IFRS 10 and IAS 28 “Sale or Contribution of Assets between an Investor and its Associate or Joint Venture”

The amendments stipulated that, when an entity sells or contributes assets that constitute a business (as defined in IFRS 3) to an associate or joint venture, the gain or loss resulting from the transaction is recognized in full. Also, when an entity loses control of a subsidiary that contains a business but retains significant influence or joint control, the gain or loss resulting from the transaction is recognized in full.

Conversely, when an entity sells or contributes assets that do not constitute a business to an associate or joint venture, the gain or loss resulting from the transaction is recognized only to the extent of the unrelated investors’ interest in the associate or joint venture, i.e. the entity’s share of the gain or loss is eliminated. Also, when an entity loses control of a subsidiary that does not contain a business but retains significant influence or joint control in an associate or a joint venture, the gain or loss resulting from the transaction is recognized only to the extent of the unrelated investors’ interest in the associate or joint venture, i.e. the entity’s share of the gain or loss is eliminated.

9) Annual Improvements to IFRSs: 2012-2014 Cycle

Several standards including IFRS 7 and IAS 34 were amended in this annual improvement.

The amendments to IFRS 7 provide additional guidance to clarify whether a servicing contract is continuing involvement in a transferred asset. In addition, the amendments clarify that the offsetting disclosures are not explicitly required for all interim periods.

IAS 34 was amended to clarify that other disclosure information required by IAS 34 should be included in interim financial statements. If the Group includes the information in other statements (such as management commentary or risk report) issued at the same time, it is not required to repeat the disclosure in the interim financial statements. However, it is required to include a cross-reference from the interim financial statements to that issued statements that is available to users on the same terms and at the same time as the interim financial statements.

10) Amendment to IAS 1 “Disclosure Initiative”

The amendment clarifies that the consolidated financial statements should be prepared for the purpose of disclosing material information. To improve the understandability of its consolidated financial statements, the Group should disaggregate the disclosure of material items into their different natures or functions, and disaggregate material information from immaterial information.

The amendment further clarifies that the Group should consider the understandability and comparability of its consolidated financial statements to determine a systematic order in presenting its footnotes.

Except for the above impact, as of the date the consolidated financial statements were authorized for issue, the Group is continuously assessing the possible impact that the application of other standards and interpretations will have on the Group’s financial position and financial performance, and will disclose the relevant impact when the assessment is completed.

4. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

a. Statement of compliance

The consolidated financial statements have been prepared in accordance with the Regulations Governing the Preparation of Financial Reports by Securities Issuers and IAS 34 “Interim Financial Reporting” as endorsed by the FSC. Disclosure information included in the consolidated financial statements is less than those required in a complete set of annual financial statements.

b. Basis of consolidation

Refer to Note 12, Table 7, and Table 9 for information on the subsidiaries included in the consolidated financial statements.

c. Other significant accounting policies

The accounting policies applied to the accompanying consolidated financial statements were the same as those followed in the preparation of the Group’s consolidated financial statements for the year ended December 31, 2014, except for those policies described below.

1) Business combinations

Acquisitions of businesses are accounted for using the acquisition method. Acquisition-related costs are generally recognized in profit or loss as incurred.

Goodwill is measured as the excess of the sum of the consideration transferred, the amount of any non-controlling interests in the acquiree, and the fair value of the acquirer’s previously held equity interest in the acquiree over the net of the acquisition-date amounts of the identifiable assets acquired and the liabilities assumed.

Non-controlling interests are initially measured at the non-controlling interests’ proportionate share of the fair value of the acquiree’s identifiable net assets. The choice of measurement basis is made on a transaction-by-transaction basis. Other types of non-controlling interests are measured at fair value.

If the initial accounting for a business combination is incomplete by the end of the reporting period in which the combination occurs, the Group reports provisional amounts for the items for which the accounting is incomplete. Those provisional amounts are adjusted retrospectively during the measurement period, or additional assets or liabilities are recognized, to reflect new information obtained about facts and circumstances that existed as of the acquisition date that, if known, would have affected the amounts recognized as of that date.

2) Foreign currencies

In preparing the financial statements of each individual group entity, transactions in currencies other than the entity’s functional currency (foreign currencies) are recognized at the rates of exchange prevailing at the dates of the transactions.

At the end of each reporting period, monetary items denominated in foreign currencies are retranslated at the rates prevailing at that date. Exchange differences on monetary items arising from settlement or translation are recognized in profit or loss in the period in which they arise.

Nonmonetary items measured at fair value that are denominated in foreign currencies are retranslated at the rates prevailing at the date when the fair value was determined. Exchange differences arising on the retranslation of non-monetary items are included in profit or loss for the period except for exchange differences arising from the retranslation of non-monetary items in respect of which gains and losses are recognized directly in other comprehensive income, in which case, the exchange differences are also recognized directly in other comprehensive income.

Non-monetary items that are measured at historical cost in a foreign currency are not retranslated.

For the purposes of presenting consolidated financial statements, the assets and liabilities of the Group's foreign operations (including of the subsidiaries and associates in other countries or currencies used different with the Company) are translated into New Taiwan dollars using exchange rates prevailing at the end of each reporting period. Income and expense items are translated at the average exchange rates for the period. Exchange differences arising are recognized in other comprehensive income.

On the disposal of a foreign operation (i.e. a disposal of the Company's entire interest in a foreign operation, or a disposal involving loss of control over a subsidiary that includes a foreign operation or a disposal involving loss of significant influence over an associate that includes a foreign operation), all of the exchange differences accumulated in equity in respect of that operation attributable to the owners of the Company are reclassified to profit or loss.

In relation to a partial disposal of a subsidiary that does not result in the Company losing control over the subsidiary, the proportionate share of accumulated exchange differences is re-attributed to non-controlling interests of the subsidiary and is not recognized in profit or loss. For all other partial disposals, the proportionate share of the accumulated exchange differences recognized in other comprehensive income is reclassified to profit or loss.

Goodwill and fair value adjustments on identifiable assets and liabilities acquired arising on the acquisition of a foreign operation are treated as assets and liabilities of the foreign operation and translated at the rate of exchange prevailing at the end of each reporting period. Exchange differences arising are recognized in other comprehensive income.

3) Investments in associates

An associate is an entity over which the Group has significant influence and that is neither a subsidiary nor an interest in a joint venture.

The Group uses the equity method to account for its investments in associates.

Under the equity method, investments in an associate are initially recognized at cost and adjusted thereafter to recognize the Group's share of the profit or loss and other comprehensive income of the associate. The Group also recognizes the changes in the Group's share of equity of associates attributable to the Group.

Any excess of the cost of acquisition over the Group's share of the net fair value of the identifiable assets and liabilities of an associate at the date of acquisition is recognized as goodwill, which is included within the carrying amount of the investment and is not amortized. Any excess of the Group's share of the net fair value of the identifiable assets and liabilities over the cost of acquisition, after reassessment, is recognized immediately in profit or loss.

When the Group subscribes for additional new shares of the associate at a percentage different from its existing ownership percentage, the resulting carrying amount of the investment differs from the amount of the Group's proportionate interest in the associate. The Group records such a difference as an adjustment to investments with the corresponding amount charged or credited to capital surplus - changes in the Group's share of equity of associates. If the Group's ownership interest is reduced due to the additional subscription of the new shares of associate, the proportionate amount of the gains or losses previously recognized in other comprehensive income in relation to that associate is reclassified to profit or loss on the same basis as would be required if the investee had directly disposed of the related assets or liabilities. When the adjustment should be debited to capital surplus, but the capital surplus recognized from investments accounted for by the equity method is insufficient, the shortage is debited to retained earnings.

When the Group's share of losses of an associate equals or exceeds its interest in that associate (which includes any carrying amount of the investment accounted for by the equity method and long-term interests that, in substance, form part of the Group's net investment in the associate), the Group discontinues recognizing its share of further losses. Additional losses and liabilities are recognized only to the extent that the Group has incurred legal obligations, or constructive obligations, or made payments on behalf of that associate.

The entire carrying amount of the investment (including goodwill) is tested for impairment as a single asset by comparing its recoverable amount with its carrying amount. Any impairment loss recognized forms part of the carrying amount of the investment. Any reversal of that impairment loss is recognized to the extent that the recoverable amount of the investment subsequently increases.

The Group discontinues the use of the equity method from the date on which its investment ceases to be an associate. Any retained investment is measured at fair value at that date and the fair value is regarded as its fair value on initial recognition as a financial asset. The difference between the previous carrying amount of the associate attributable to the retained interest and its fair value is included in the determination of the gain or loss on disposal of the associate. The Group accounts for all amounts previously recognized in other comprehensive income in relation to that associate on the same basis as would be required if that associate had directly disposed of the related assets or liabilities. If an investment in an associate becomes an investment in a joint venture or an investment in a joint venture becomes an investment in an associate, the Group continues to apply the equity method and does not remeasure the retained interest.

When a group entity transacts with its associate, profits and losses resulting from the transactions with the associate and joint venture are recognized in the Group's consolidated financial statements only to the extent of interests in the associate that are not related to the Group.

4) Retirement benefit costs

Defined benefit costs (including service cost, net interest and rereasurement) under the defined benefit retirement benefit plans are determined using the projected unit credit method. Service cost (including current and past service cost and net interest on the net defined benefit liability) are recognized as employee benefits expense in the period they occur. Remeasurement, comprising actuarial gains and losses, the effect of the changes to the asset ceiling, and the return on plan assets (excluding interest), is recognized in other comprehensive income in the period in which they occur. Remeasurement recognized in other comprehensive income is reflected immediately in retained earnings and will not be reclassified to profit or loss.

Net defined benefit liability (asset) represents the actual deficit (surplus) in the Group's defined benefit plan. Any surplus resulting from this calculation is limited to the present value of any refunds from the plans or reductions in future contributions to the plans.

Pension cost for an interim period is calculated on a year-to-date basis by using the actuarially determined pension cost rate at the end of the prior financial year, adjusted for significant market fluctuations since that time and for significant plan amendments, settlements, or other significant one-off events.

5) Taxation

Income tax expense represents the sum of the tax currently payable and deferred tax. Interim period income taxes are assessed on an annual basis and calculated by applying to an interim period's pre-tax income the tax rate that would be applicable to expected total annual earnings.

The measurement of deferred tax liabilities and assets reflects the tax consequences that would follow from the manner in which the Group expects, at the end of the reporting period, to recover or settle the carrying amount of its assets and liabilities.

5. CRITICAL ACCOUNTING JUDGMENTS AND KEY SOURCES OF ESTIMATION UNCERTAINTY

Refer to the Group's consolidated financial statements for the year ended December 31, 2014 for significant accounting judgments and estimates and key sources of estimation uncertainty, except for those policies described below.

Fair Value Measurements and Valuation Processes

If some of the Group's assets and liabilities measured at fair value have no quoted prices in active markets, the Group determine the appropriate valuation techniques for fair value measurements.

Where Level 1 inputs are not available, the Group would determine appropriate inputs by referring to the investment contracts, quoted prices of similar instruments in active markets, and market prices or rates and specific features of derivatives. If the actual changes of inputs in the future differ from expectation, fair value might vary accordingly. The Group updates inputs every quarter to confirm the appropriateness of fair value measurement.

Information about the valuation techniques and inputs used in determining the fair value of various assets and liabilities is disclosed in Note 26.

The Company entered into forward exchange contracts during the nine months ended September 30, 2015 and 2014 to manage exposures due to exchange rate fluctuations of foreign-currency denominated assets and liabilities. The Company's financial hedging strategy is to minimize risks due to market price fluctuations and cash flows; however, because these contracts did not meet the criteria for hedge effectiveness, they were not subject to hedge accounting.

For its securities borrowing and lending transactions, the Group placed some of its quoted domestic stocks, recorded under available-for-sale assets - noncurrent, in a trust at CTBC Financial Holding Co., Ltd. As of September 30, 2015, December 31, 2014 and September 30, 2014, the stocks held in trust amounted to \$1,497,185 thousand, \$1,792,025 thousand and \$1,475,100 thousand, respectively. Refer to Table 3 for more information. On the transactions, the Group recognized gains of \$118 thousand and \$90 thousand in the nine months ended September 30, 2015 and 2014, respectively. These gains were recorded under other nonoperating income.

Accounts Receivable

The average credit period on sales of goods was from 30 to 90 days. In determining the recoverability of a accounts receivable, the Group considered any change in the credit quality of the accounts receivable since the date credit was initially granted to the end of the reporting period. The Group recognized an allowance for impairment loss of 100% against all receivables over 1 year because historical experience had been that receivables that are past due beyond 1 year were not recoverable. Allowance for impairment loss were recognized against accounts receivable between 90 days and 1 year based on estimated irrecoverable amounts determined by reference to past default experience of the counterparties and an analysis of their current financial position.

For the accounts receivable balances that were past due at the end of the reporting period, the Group did not recognize an allowance for impairment loss, because there was not a significant change in credit quality and the amounts were still considered recoverable. The Group did not hold any collateral or other credit enhancements for these balances.

The aging of receivables was as follows:

	September 30, 2015	December 31, 2014	September 30, 2014
Not overdue	\$ 4,437,607	\$ 4,165,906	\$ 4,255,501

	<u>\$ 5,571,906</u>	<u>\$ 5,110,375</u>	<u>\$ 5,438,894</u>

The above aging schedule was based on the past due date.

The aging of receivables that were past due date but not impaired were as follows:

	September 30, 2015	December 31, 2014	September 30, 2014
1 to 30 days	\$ 695,604	\$ 607,795	\$ 814,758

	<u>\$ 907,934</u>	<u>\$ 747,270</u>	<u>\$ 968,233</u>

The above aging schedule was based on the past due dates.

Movement in the allowance for impairment loss recognized on accounts receivables was as follows:

	Individually Assessed for Impairment	Collectively Assessed for Impairment	Total
Balance at January 1, 2014	\$ 3,150	\$ 137,652	\$ 140,802

	<u>\$ 5,174,659</u>	<u>\$ 4,781,550</u>	<u>\$ 4,722,203</u>

The costs of inventories recognized as costs of goods sold for the three months ended September 30, 2015 and 2014 were \$5,691,445 thousand and \$5,508,412 thousand, respectively, and for the nine months ended September 30, 2015 and 2014 were \$16,931,817 thousand and \$15,836,645 thousand, respectively.

The costs of inventories were decreased by \$431,284 thousand, \$449,653 thousand and \$455,842 thousand as of September 30, 2015, December 31, 2014 and September 30, 2014, respectively when stated at the lower of cost or net realizable values.

Remark a: Not significant subsidiaries and their financial statements had not been reviewed.

Remark b: In 2013, the Company acquired 70.19% equity in AdvanPOS, which was recognized as a consolidated entity as of December 31, 2013. AdvanPOS issued ordinary shares for the exercise of employee share options, decreasing the Company's holding interest by 8.08% in 2014. In the first three quarters of 2015 and fourth quarter of 2014, the Company subscribed for an additional 6,533 thousand shares and 1,127 thousand shares of AdvanPOS, respectively, increasing its holding interest by 37.89%. These transactions increased its interest from 70.19% to 100%.

Remark c: In 2013, the Company acquired 99.97% equity of ALNC and later bought the rest of this subsidiary's shares, resulting in the subsidiary's becoming wholly owned by the Company. Thus, ALNC was recognized as a consolidated entity as of December 31, 2013. In the first quarter of 2014, the Company sold 10.27% of its holding of ALNC shares to ALNC's employees; in the second and third quarters of 2014, the Company bought 0.14% and 0.06%, respectively, of ALNC's outstanding shares. These transactions reduced its continuing interest from 100% to 89.93%.

Remark d: In the fourth quarter of 2013, the Company had acquired 100% equity of GPEG, which was recognized as a consolidated entity as of December 31, 2013. In the fourth quarter of 2014, GPEG merged with AEU, with AEU as the survivor entity.

Remark e: In the second quarter of 2015, the Company founded Advantech Innovative Design Co., Ltd. and Advantech iFactory Co., Ltd. and acquired 100% equity in each of these subsidiaries. These two subsidiaries had been recognized as consolidated entities as of September 30, 2015.

	<u>\$ 5,519,914</u>	<u>\$ 5,306,958</u>	<u>\$ 5,219,075</u>

1) Such capital surplus may be used to offset a deficit; in addition, when the Company has no deficit, such capital surplus may be distributed as cash dividends or transferred to share capital (limited to a certain percentage of the Company's capital surplus and once a year).

2) Such capital surplus arises from the effect of changes in ownership interest in a subsidiary resulted from equity transactions other than actual disposal or acquisition, or from changes in capital surplus of subsidiaries accounted for by using equity method.

c. Retained earnings and dividend policy

Under the Company's Articles of Incorporation, if the Company has earnings for the year, it should primarily make taxation payments, offset any past years' deficits and then make appropriations for its legal reserve at 10% of annual net income. In addition, a special reserve should be appropriated or reversed as needed, adding cumulative retained earnings from previous periods and retaining partially, retained earnings for corporate growth. The remainder of the income should be appropriated in the following order:

- 1) 1% to 20% as bonus to employees;
- 2) 1% or less as remuneration to directors and supervisors; and
- 3) Dividends, as proposed by the board of directors.

Recipients of stock bonuses may include subsidiaries' employees who meet the criteria set by the Company's board of directors.

The Company operates in an industry related to computers, and its business related to network servers is new but with significant potential for growth. Thus, in formulating its dividend policy, the Company takes into account the overall business and industry conditions and trends, its objective of enhancing the shareholders' long-term interests, and the sustainability of the Company's growth. The policy also requires that stock dividends be less than 75% of total dividends to retain internally generated cash within the Company to finance future capital expenditures and working capital requirements.

Any appropriations from earnings should be recorded in the year of shareholders' approval, following the year the earnings were generated.

Under the Company Act amended in May 2015, the recipients of dividends and bonuses are limited to shareholders, i.e., employees are not included. Thus, the Company will make amendments to the Company's Articles of Incorporation for approval during the 2016 annual shareholders' meeting. For information on the accrued remunerations to employees and the directors and supervisors for the three months and the nine months ended September 30, 2015 and 2014, and the actual appropriations for the years ended December 31, 2014 and 2013, please refer to Note 21- c on employee benefit expense.

Under Rule No. 1010012865 and Rule No. 1010047490 issued by the Financial Supervisory Commission and the directive titled "Questions and Answers for Special Reserves Appropriated Following Adoption of IFRSs", the Company should appropriate or reverse to a special reserve. Any special reserve appropriated may be reversed to the extent that the net debit balance reverses and thereafter distributed.

Appropriation of earnings to legal reserve should be made until the legal reserve equals the Company's paid-in capital. Legal reserve may be used to offset deficit. If the Company has no deficit and Legal reserve has exceeded 25% of the Company's paid-in capital, the excess may be transferred to capital or distributed in cash.

Except for non-ROC resident shareholders, all shareholders receiving the dividends are allowed a tax credit equal to their proportionate share of the income tax paid by the Company.

The appropriation of earnings, including bonus to employees and the remuneration to directors and supervisors for 2014 and 2013 were approved in the shareholders' meetings on May 28, 2015 and June 18, 2014, respectively. The appropriations and dividends per share were as follows:

Under the Company Act as amended in May 2015, the Company's Articles of Incorporation should stipulate a fixed amount or ratio of annual profit to be distributed as employee remuneration. However, the Company has not made consequential amendments to its policies for distribution of employee remuneration. The bonus to employees and remuneration to directors and supervisors which were estimated based on net income (after deducting bonus to employees and remuneration of directors and supervisors) and a rate stipulated in the Articles of Incorporation were as follows:

	For the Three Months Ended September 30		For the Nine Months Ended September 30	
	2015	2014	2015	2014
Bonus to employees	\$ 11,000	\$ 12,000	\$ 55,000	\$ 48,000
Remuneration of directors and supervisors	3,000	3,000	9,000	9,000

Material differences between the estimated amounts and the amounts proposed by the board of directors on or before the date the consolidated financial statements are authorized for issue, are adjusted in the year the bonus and remuneration are recognized. If there is a change in the proposed amounts after the consolidated financial statements are authorized for issue, the differences are recorded as a change in accounting estimate in the following year.

The appropriations of bonuses to employees and remuneration to directors and supervisors for 2014 and 2013 approved in the shareholders' meetings on May 28, 2015 and June 18, 2014, respectively, were as follows:

	Cash Dividends	
	For the Year Ended December 31 2014	2013
Bonus to employees	\$ 126,000	\$ 70,000
Remuneration to directors and supervisors	12,000	12,000

There was no significant difference between the amounts of the bonus to employees and the remuneration to directors and supervisors approved in the shareholders' meetings on May 28, 2015 and June 18, 2014 and the amounts recognized in the financial statements for the years ended December 31, 2014 and 2013, respectively.

Information on bonuses to employees and remuneration to directors and supervisors approved in the shareholders' meetings is available on the Market Observation Post System website of the Taiwan Stock Exchange.

If the Company offered to settle bonuses paid to employees in cash or shares, the Company assumes that the entire amount of the bonus would be settled in shares, and the resulting potential shares will be included in the weighted average number of outstanding shares used in the computation of diluted earnings per share, if the effect is dilutive. This dilutive effect of the potential shares is included in the computation of diluted earnings per share until the shareholders resolve the number of shares to be distributed to employees at their meeting in the following year.

24. SHARE-BASED PAYMENT ARRANGEMENTS

Qualified employees of the Company and its subsidiaries were granted 5,000 options in August 2014; 3,000 options in July 2010; and 10,000 options in December 2009. Each option entitles the holder to subscribe for one thousand common shares of the Company. The holders of these shares include employees whom meet certain criteria set by the Company, from both domestic and overseas subsidiaries in which the Company directly or indirectly invests over 50%. Options issued on August 2014, July 2010, and December 2009 are valid for six, five and five years, respectively. All are exercisable at certain percentages after the second anniversary year from the grant date. Options granted in 2009 and 2010 had an exercise price equal to the closing price of the Company's common shares listed on the grant date, and the exercise price of those granted in 2014 was NT\$100 per share. For any subsequent changes in the Company's paid-in capital, the exercise price and the number of options will be adjusted accordingly.

3) Valuation techniques and inputs applied for the purpose of measuring Level 2 fair value measurement

Derivatives held by the Company were foreign currency forward contracts, whose fair values were calculated using discounted cash flow. Future cash flows are estimated based on observable forward exchange rates at the end of the reporting period and contract forward rates, discounted at a rate that reflects the credit risk of various counterparties.

4) Valuation techniques and inputs applied for the purpose of measuring Level 3 fair value measurement

The fair values of investment products denominated in RMB were using income approach. In this approach, the discounted cash flow method was used to capture the present value of the expected future economic benefits to be derived from the ownership of these investees. Had the inputs to the valuation model been changed to reflect reasonably possible alternative assumptions and had all the other variables been held constant, the fair value of the shares would have decreased/increased.

Note 3: The balances included financial liabilities measured at amortized cost, which comprise short-term borrowings, trade and other payables, dividends payable, and long-term payables.

c. Financial risk management objectives and policies

The Group's major financial instruments included equity investments, trade receivables, trade payables, bonds payable, and borrowings. The Group's Corporate Treasury function provides services to the business, coordinates access to domestic and international financial markets, monitors and manages the financial risks relating to the operations of the Group through internal risk reports which analyze exposures by degree and magnitude of risks. These risks include market risk (including currency risk, interest rate risk and other price risk), credit risk, and liquidity risk.

The Group sought to minimize the effects of these risks by using derivative financial instruments to hedge risk exposures. The use of financial derivatives was governed by the Group's policies approved by the board of directors, which provided written principles on foreign exchange risk, interest rate risk, credit risk, the use of financial derivatives and non-derivative financial instruments, and the investment of excess liquidity. Compliance with policies and exposure limits was reviewed by the internal auditors on a continuous basis. The Group did not enter into financial instrument transactions (including derivative financial instruments) for speculative purposes.

The Corporate Treasury function reported quarterly to the board of directors on the Group's current derivative instrument management.

1) Market risk

The Group's activities expose it primarily to financial risks of changes in foreign currency exchange rates (see (a) below) and interest rates (see (b) below). The Group entered into a variety of derivative financial instruments to manage its exposure to foreign currency risk and interest rate risk.

There had been no change to the Group's exposure to market risks or the manner in which these risks were managed and measured.

a) Foreign currency risk

The Group had foreign currency sales and purchases, which exposed it to foreign currency risk. The Group manages the risk that fluctuations in foreign currency could have on foreign-currency denominated assets and future cash flow by entering into a variety of derivative financial instruments, which allow the Group to mitigate but not fully eliminate the effect.

These forward exchange contracts did not meet the criteria for hedge effectiveness, they were not subject to hedge accounting.

The carrying amounts of the Group's foreign currency denominated monetary assets and monetary liabilities (including those eliminated on consolidation) are set out in Note 30. As for the carrying amounts of derivatives exposing to foreign currency risk at the end of the reporting period, refer to Note 7.

Sensitivity analysis

The Group was mainly exposed to the U.S. dollar, Euro and Renminbi.

The following table details the Group's sensitivity to a 5% increase in New Taiwan dollars (the functional currency) against the relevant foreign currencies. The 5% sensitivity rate is used when reporting foreign currency risk internally to key management personnel and represents management's assessment of the reasonably possible change in foreign exchange rates. The sensitivity analysis included only outstanding foreign currency-denominated monetary items and foreign currency forward contracts designated as cash flow hedges, and their translation at the end of the reporting period is adjusted for a 5% change in exchange rates. A positive number below indicates an increase in pre-tax profit and other equity associated with a 5% strengthening of the New Taiwan dollar against the relevant currency. For a 5% weakening of the New Taiwan dollar against the relevant currency, there would be an equal and opposite impact on pre-tax profit and other equity, and the balances below would be negative.

	U.S. Dollar Impact		Euro Impact		Renminbi Impact	
	For the Nine Months		For the Nine Months		For the Nine Months	
	Ended September 30		Ended September 30		Ended September 30	
	2015	2014	2015	2014	2015	2014
Profit or loss	\$ 18,192 (Note 1)	\$ (11,306) (Note 1)	\$ 39,241 (Note 2)	\$ 66,865 (Note 2)	\$ (1,305) (Note 3)	\$ 974 (Note 3)

Note 1: This was mainly attributable to the exposure outstanding on U.S. dollars denominated cash, trade receivables, and trade payables, which were not hedged at the end of the reporting period.

Note 2: This was mainly attributable to the exposure outstanding on Euro denominated cash, trade receivables, and trade payables, which were not hedged at the end of the reporting period.

Note 3: This was mainly attributable to the exposure outstanding on Renminbi denominated cash, trade receivables and trade payables, which were not hedged at the end of the reporting period.

b) Interest rate risk

The Group's floating-rate bank savings are exposed to risk on changes in interest rates for financial assets. The Group was also exposed to risk on changes in interest rates for financial liabilities, specifically fixed and floating-rate bank borrowings. The Group was not engaged in hedging activities for speculative purposes. The Group's management monitors fluctuations in market interest rates regularly to ensure that interest rate risks are minimized.

The Group's fixed-term bank deposits are exposed to fair value interest rate risk; however, this expected risk is insignificant.

The carrying amount of the Groups financial assets and financial liabilities with exposure to interest rates at the end of the reporting period were as follows:

	September 30, 2015	December 31, 2014	September 30, 2014
Fair value interest rate risk			
Financial assets	\$ 848,362	\$ 1,163,222	\$ 1,508,032
Financial liabilities	84,000	3,080	200,144
Cash flow interest rate risk			
Financial assets	2,273,505	2,586,731	1,925,538
Financial liabilities	-	-	5,000

Sensitivity analysis

The sensitivity analyses below were determined based on the Group's exposure to interest rates for non-derivative instruments at the end of the reporting period. For floating rate liabilities, the analysis was prepared assuming the amount of the liability outstanding at the end of the reporting period was outstanding for the whole year. A 50 basis point increase or decrease was used when reporting interest rate risk internally to key management personnel and represents management's assessment of the reasonably possible change in interest rates.

Had interest rates been 50 basis points higher and all other variables had been held constant, the Group's pre-tax profit for the nine months ended September 30, 2015 and 2014 would have increased by \$8,526 thousand and \$7,202 thousand, respectively. Had interest rates been 50 basis points lower, the effects on the Group's pre-tax profit would have been of the same amounts but negative. The source of the negative effects would have been mainly the floating-interest rates on bank savings.

c) Other price risk

The Group was exposed to equity price risk through its investments in listed equity securities and open-end mutual funds. The Group manages this exposure by maintaining a portfolio of investments with different risks. The Group's equity price risk was mainly concentrated on open-end mutual funds and equity instruments trading in the Taiwan Stock Exchange.

Sensitivity analysis

The sensitivity analyses below were determined based on the exposure to equity price risks at the end of the reporting period.

Had equity prices been 1% higher, pre-tax profits for the nine months ended September 30, 2015 and 2014 would have increased by \$1,537 thousand and \$965 thousand as a result of changes in fair value of held-for-trading investments. Pre-tax other comprehensive income for the nine months ended September 30, 2015 and 2014 would have increased by \$40,937 thousand and \$28,738 thousand, respectively, as a result of changes in fair value of available-for-sale investments. Had equity prices been 1% lower, the effects on pre-tax other comprehensive gains would have been of the same amounts but negative.

2) Credit risk

Credit risk refers to the risk that counterparty will default on its contractual obligations resulting in financial loss to the Group. As of the reporting period, the Group's maximum exposure to credit risk due to failure to discharge an obligation by the counterparties arises from the carrying amount of the respective recognized financial assets, as stated in the balance sheets.

In order to minimize credit risk, the management of the Group has delegated a team responsible for determining credit limits, credit approvals and other monitoring procedures to ensure that follow-up action is taken to recover overdue debts. In addition, the Group reviews the recoverable amount of each individual trade debt at the end of the reporting period to ensure that adequate impairment losses are made for irrecoverable amounts. In this regard, the directors of the Group consider the Group's credit risk as significantly reduced.

Trade receivables consisted of a large number of customers, spread across diverse industries and geographical areas and, thus, no concentration of credit risk was observed.

3) Liquidity risk

The Group manages liquidity risk by monitoring and maintaining a level of cash and cash equivalents deemed adequate to finance the Group's operations and mitigate the effects of fluctuations in cash flows. In addition, management monitors the utilization of bank borrowings and ensures compliance with loan covenants.

Bank borrowings are a significant source of the Group's liquidity. As of September 30, 2015, December 31, 2014 and September 30, 2014, the Company had available unutilized short-term bank loan facilities set out in (c) below.

Ultimate responsibility for liquidity risk management rests with the board of directors, which has built an appropriate liquidity risk management framework for the Company's short, medium and long-term funding and liquidity management requirements. The Company manages liquidity risk by maintaining adequate reserves and continuously monitoring forecast and actual cash flows as well as matching the maturity profiles of financial assets and liabilities.

a) Liquidity and interest risk rate tables for non-derivative financial liabilities

The following table details the Group's remaining contractual maturity for its non-derivative financial liabilities with agreed repayment periods. The tables had been drawn up based on the undiscounted cash flows of financial liabilities from the earliest date on which the Group can be required to pay. The tables included both interest and principal cash flows. Specifically bank loans with a repayment on demand clause were included in the earliest time band regardless of the probability of the banks choosing to exercise their rights. The maturity dates for other non-derivative financial liabilities were based on agreed repayment dates.

For the liabilities with floating interests, the undiscounted amounts were derived from the interest rate curve at the end of the reporting period.

Profit before tax (continuing operations)							<u>\$ 4,520,592</u>

(Concluded)

The income above was generated from transactions with external customers. There were no sales between segments during the nine months ended September 30, 2015 and 2014, respectively.

Segment profit represented the profit before tax earned by each segment without allocation of central administration costs and directors' salaries, share of profits of associates, gain recognized on the disposal of interest in former associates, rental revenue, interest income, gain or loss on disposal of property, plant and equipment, gain or loss on disposal of financial instruments, exchange gain or loss, valuation gain or loss on financial instruments, finance costs and income tax expense. This was the measure reported to the chief operating decision maker for the purpose of resource allocation and assessment of segment performance.
